The Big Wave

Chair Model

Supreme		Assembly DIY	Fully Assembled
Steel Frame	42 lbs.	\$980	\$1,300
Aluminum Frame	34 lbs.	\$1,480	\$1,800

Options

High Durable

The Supreme passed the severe standard twice. It has already been tested by over 50,000 users and also tested in tough terrain environment.

Long Wheel Base

The Supreme is more than just tough. We created the chair with in outdoor efficiency and extended wheel bottom for stability for fat tires for footing. The long wheel base off-loads some weight from the front casters, making it easier for the casters to go over obstacles.

Compact

It is reasonably compact so your adventure does not need to start with a truck. The backrest folds down to the seat, and the rear wheels have quick release axles. The sideguards are removable as well.
