TECHNICAL SPECIFICATIONS

The "Straight" Style

All welded one piece frame. Aluminum tubing for the lightest ride and lifting. Very customizable and many frame taper options. Has bottom welded stabilizer bars to provide durability and support.

The "Curve" Style

The welded bottom stabilizer bars can also be "curved" style to add some more personality and flare.

Welded fixed caster housing. The aluminum material on the caster housing with a special cross-section is optimized for caster support. The housing firmly holds the caster case and maintains the optimal caster angle. Option to request the caster housings to be inside or outside style.
